Thank you Dennis. I just forwarded this to Patrick for technical review. I will review this as well. When Patrick is back in the office I will discuss schedule with him. At this point I anticipate that I will get back to you within a week from today.

Cynthia

Please find a preliminary Risk Evaluation for the Kapalama PCB Transformer site with a discussion of our evaluation and results.

The methodology and calculations were based on our discussions with you and Pat Wilson from your office.

If you find the results acceptable, please let us know so the State can commence filling the excavation or provide comments so that we may address them. We will then proceed with a complete site closure report including the risk evaluation results.

Please feel free to call if you would like to discuss any further.

Sorry for delay in returning message. I lost email earlier this week and am trying to catch up on communications.

PCS started removal today (Thur) and I am scheduled to go out on Friday to collect confirmation samples.

I expect two weeks for results.

Dennis Poma

Hello Dennis,

I just wanted to check in with you regarding field work at the Kapalama Military Base. Were you able to finish the soil and concrete removal last week? Did you get confirmation sampling results back? Please let me know when you get a chance.

Thanks,  
Cynthia

Please find a lab report from PCS for 32 transformers at KMR. All were less than 10 ppm.

Here is tentative schedule for additional removal.

- Mobilization: 7/13/15
- additional soil removal and concrete: 7/14-7/16
- sampling: 7/17/15
- Soil trans and disposal: 7/17-7/31
- Site restoration: 7/27-7/28
